

Pako Jack Motsumi

+267 76011993 | pjmotsumi06@gmail.com

PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on academic experience in software development, object-oriented programming, frontend development, and database management. Experienced in designing, implementing and testing structured applications through varied coursework and projects. Demonstrates strong analytical thinking, and a methodical approach to solving technical problems. Eager to apply technical knowledge and collaborate in a professional internship setting.

EDUCATION

Bachelor of Science in Computer Science & Software Engineering
Botswana International University of Science & Technology (BIUST)

August 2023 – August 2027
Palapye, Botswana

TECHNICAL SKILLS

Programming Languages | Python, Java, C, C++

Web Technologies | HTML, CSS, PHP

Databases | MySQL (SQL)

Concepts | Object-Oriented Programming, Procedural Programming, Problem Solving, Machine Learning (Introductory)

Developer Tools | Git, Visual Studio Code, PyCharm, IntelliJ, Figma

Frameworks | Java Swing, JDBC

Soft Skills | Team Collaboration, Communication, Analytical Thinking

ACADEMIC PROJECTS

Garage Management System (C++)

University Coursework

- Designed and implemented a console-based system to manage customer records, inventory, and invoices
- Applied Object Oriented principles such as encapsulation, modular design, and class-based architecture
- Implemented input validation and basic error handling to improve system reliability

E-commerce platform UI/UX Design (Figma, HTML, CSS, PHP)

Group Project

- Assisted in the design of a student focused online marketplace
- Focused on usability, layout consistency, and user-friendly design principles
- Collaborated with other students to align design decisions with functional requirements

Smart Visitor Registration System (Java, MySQL)

University Coursework

- Designed and implemented a GUI-based application to manage visitor registration, check-ins, and attendance within a company
- Applied Object Oriented principles with a modular architecture across models, database access objects, and frontend views
- Integrated MySQL database for persistent data storage
- Implemented input validation and error handling to improve system performance, reliability and consistency

ADDITIONAL INFORMATION

- Willing to learn and adapt to professional environments, tools and workflows
- Strong interest in software development and technology-driven solutions, with a focus on back-end development
- Eager to apply academic knowledge in real-world settings and gain hands-on work experience
